

MINOR AILMENT PRESCRIBING: HOW YOUR PHARMACIST CAN HELP

What is Minor Ailment Prescribing?

Pharmacists in Manitoba can now assess and prescribe medications for certain minor health conditions. These are common, self-limiting issues that don't require lab tests or a full doctor's visit. This change makes care faster and more accessible, especially when you're unable to see a physician right away.

What Can Pharmacists Prescribe For?

All our Pharmacists are trained and authorized to prescribe medications for several minor and self-limiting conditions, including:

Acne

Smoking Cessation

Oral Thrush

Canker Sores

Athlete's Foot

Haemorrhoids

Vomiting in Pregnancy

Eczema & Poison Ivy

Allergies

FREQUENTLY ASKED QUESTIONS

Do I need an appointment?

- We accept walk-ins, but calling ahead is recommended to avoid long waits.

What does it cost?

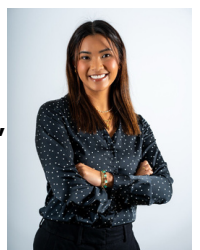

- Minor ailment assessments have a fee. Medication costs are covered the same way as if prescribed by your doctor (e.g. Pharmacare and insurance). To find out more, call us at Pharmacie Dufresne!

Is it safe?

- Yes! Pharmacists are medication experts and must complete mandatory training before prescribing. They follow strict guidelines and will refer you to a doctor if needed.
